Single-Use Configuration

Eliminates costs and time associated with fiber maintenance and reprocessing as well as potential damage due to multi-case handling.
 Designed to be less likely to cause scope or laser console damage than reusable fibers.

Optical Connection

Designed to match the manufacturer specifications of the Laser Systems including laser beam spot size, focal point distance and focus angles.

Versatile Application

Full line of fiber sizes with maximum wattage ratings from 45W to 120W for a variety of urologic cases including stones.
